PROFESSIONAL SUMMARY

Full Stack Developer with nearly 2 years of hands-on experience building production web applications with Laravel, React.js, Next.js, Inertia.js, Vue.js, and MySQL. Contributed to 12 projects across two companies, including auction and eCommerce marketplaces, a real estate tokenization platform, property portals, a subscription store, and a real-time scheduling system. Skilled in RESTful APIs, authentication and role-based access control (RBAC), payment integrations (Stripe, PayFast), and Google Maps/Places APIs.

TECHNICAL SKILLS

Backend:	PHP, Laravel, CodeIgniter, Python, RESTful APIs, Laravel Sanctum, RBAC
Frontend:	React.js, Next.js, Vue.js, Inertia.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Databases:	MySQL, Redis, Firebase (Firestore)
Integrations:	Stripe, PayFast, Google Maps & Places APIs, OneSignal, WhatsApp messaging service
Tools:	Git, GitHub, Postman, Cursor, Antigravity
CMS & Platforms:	Shopify

WORK EXPERIENCE

Full Stack Developer | XpertBid

Aug 2025 – Present

Part-time, Remote

- Build and maintain XpertBid's marketplace platforms with Laravel, Inertia.js, React.js, MySQL, and Redis, plus two Next.js frontends that run on shared Laravel APIs.
- Started as a frontend developer on the storefront and admin panel UI, then moved into Laravel backend development and built the current Laravel + Inertia + React version of the platform.
- Delivered auctions, standard and business product sales, a reverse marketplace, and a 1 Rupee auction, with PayFast payments, Google Maps APIs, and email and WhatsApp notifications.
- Designed single sign-on and global logout across three XpertBid sites using Sanctum tokens, session cookies, and one-time auth bridge tokens.

Full Stack Developer | Acusync Technologies

Dec 2024 – Oct 2026

Karachi, Pakistan

- Worked on 8 client projects across Laravel, React, Vue, Next.js, and Firebase stacks, from requirement analysis and database design to APIs, frontend, and deployment.
- Built secure RESTful APIs, role-based access control, email OTP verification, and two-factor authentication for production systems.
- Integrated Stripe, Google Pay, MoMo Pay, Google Maps/Places APIs, and Firebase into client applications.
- Built custom admin CMS panels with queued media processing, SEO redirect handling, and rich-text editors.
- Contributed to an existing codebase as a second developer, extending it with new subscription and checkout features.

PROJECTS

XpertBid – Auction & eCommerce Marketplace

xpertbid.com

Laravel, Inertia.js, React.js, MySQL, Redis | *Full Stack Developer*

- Built the auction system: verified sellers create auctions, users bid with full bid history, and a My Bids area shows active, won, and lost bids.
- Added email and WhatsApp alerts for outbid, won, and lost events, plus a 24-hour payment window that passes the win to the second bidder.
- Developed standard products, business products (stock, SKUs, barcodes), a reverse marketplace with location-based seller notifications, and a 1 Rupee auction.
- Integrated PayFast checkout and Google Maps APIs, and built a role-based admin panel with marketing notifications and Laravel scrapers for Daraz, OLX, and PropertyFinder.

XpertProperty & XpertBuild – Property and Renovation Sites

property.xpertbid.com

Next.js, Laravel REST APIs, Laravel Sanctum | *Full Stack Developer*

- Built two separate Next.js frontends (property.xpertbid.com and build.xpertbid.com) on the shared Laravel backend to separate property and renovation categories from the main marketplace.
- Solved the cross-site login problem: users logged in on xpertbid.com stay logged in on both sites, using silent cookie-based token exchange and one-time auth bridge tokens.
- Implemented global logout, tab-focus session sync, and a keep-alive ping so sessions stay consistent across all three sites.

Tokenization – Fractional Real Estate Platform

Screenshots in portfolio

Laravel 12, Vue 3, Inertia.js, MySQL, Stripe | *Full Stack Developer*

- Built a platform where KYC-verified investors buy tokens of properties, earn monthly rental yield, and trade tokens on a peer-to-peer secondary marketplace.
- Implemented Stripe and admin-verified bank-transfer payments, a wallet ledger, and a 6-step onboarding wizard with document upload.
- Used database row locking and idempotent webhooks to prevent overselling and double payouts, and automated rent distribution with scheduled commands.
- Built an investor dashboard with Chart.js and an RBAC admin panel with KYC queues and push notifications.

Smart Renovation – Luxury Design Website & Custom CMS

smartrenovation.acusync.net

Laravel, React, TypeScript, Inertia.js, MySQL | *Full Stack Developer*

- Built a corporate website and custom CMS so the client can manage projects, services, articles, press, awards, reviews, and leads without a developer.
- Developed a dual gallery system (public and hidden) with room tagging, drag-and-drop ordering, and one-click cover promotion.
- Added a queued media pipeline for large photos and a database-driven 301 redirect engine that preserved SEO, with PHPUnit tests.

Dubai Street Kitties – Cat Rescue & Adoption Platform

dubaistreetkitties.com

Laravel 12, React, Inertia.js (SSR), Tailwind CSS | *Full Stack Developer*

- Built a public adoption site with multi-filter cat search, image galleries, and downloadable medical reports.
- Developed an admin portal with cat management, drag-and-drop photos, medical records and costs in AED, analytics, and role-based access.
- Added admin-managed dropdown options that sync to existing records, and SEO meta tags on every page.

Bison TradeWorks – Bilingual B2B Sourcing Platform

Screenshots in portfolio

Laravel, React, Inertia.js, MySQL | *Full Stack Developer*

- Built a bilingual (English/Spanish) platform connecting Mexican manufacturers with US and Canadian brands, with a filterable catalogue and lead capture.
- Created a database-driven translation system with caching, locale-aware product URLs, and a translation manager in the admin panel.
- Built an RBAC admin panel with audit logging, a product editor with image optimization, and structured SEO data.

Al Salama – Training & Event Scheduling System

event.alsalama.ae

Next.js, React, Firebase, Google Places API | *Full Stack Developer*

- Built a real-time calendar (month, week, and day views) synced live with Firestore, with multi-filter search.
- Implemented location-aware trainer conflict detection, training center capacity validation, and multi-company event booking.
- Added an expired-trainings tracker, a recycle bin with restore, and admin modules for users, courses, and centers.

Mr. Barni – UAE Real Estate Marketplace

Screenshots in portfolio

Laravel, React, TypeScript, Inertia.js, MySQL | *Full Stack Developer (in development when I left)*

- Built a multi-role property portal for agencies, agents, sellers, investors, and buyers, with UAE-specific listing fields and map embeds.
- Developed a listing workflow with staged change requests that admins review before edits go live, plus a lead CRM with WhatsApp click tracking.
- Implemented admin two-factor authentication, audit logs, an investor watchlist, and PWA support.

ADMA – Abu Dhabi Martial Arts Academy

adma.academy

Laravel, MySQL | *Full Stack Developer*

- Built the academy website, a membership module, and a checkout flow supporting Google Pay and MoMo Pay.

Emirati Coffee – Coffee Subscription Store

Screenshots in portfolio

Laravel, MySQL, Stripe | *Backend Developer (second developer)*

- Built a subscription module with 3-, 6-, and 12-month plans and custom delivery schedules, such as 12 deliveries over 6 months.
- Implemented guest checkout and Stripe payments inside an existing codebase.

ADXC – Abu Dhabi Extreme Championship

adxcworld.com

Laravel | *Frontend Developer (UI)*

- Built the Chairman's Message section and the Athletes page for the championship website.

EDUCATION

Intermediate (Computer Science)

2025 – Present

Liaquat Govt. Degree Boys College

Matriculation (Science)

2023 – 2025

Ishaat-ul-Quran Govt. Boys School
