HAMMAD AHMED

MERN Stack Developer | Karachi, Sindh, Pakistan

0311-0250787 | syedhammadahmed121@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing responsive UIs, integrating REST APIs, and working with real-time databases such as Firebase and Supabase. Contributed to a 6-member team e-commerce project and independently built and deployed e-commerce and finance applications. Strong foundation in modern JavaScript (ES6+), state management, Git/GitHub collaboration, and mobile-first design.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux/React Hooks, Tailwind CSS, Framer Motion, Bootstrap, Responsive/Mobile-First Design
- **Backend:** Node.js, Express.js, Mongoose, REST API Design & Integration
- **Databases:** MongoDB, Firebase (Firestore), Supabase
- **Tools & Platforms:** Git, GitHub, Postman, Figma, Vercel, VS Code

PROJECTS

E-Commerce Platform — MERN Stack (Team Project, 6 Developers) Live Demo

Role: Frontend Developer — Product Discovery Features | React.js, Node.js, Express.js, MongoDB

- Built the **Product Details page** with a multi-image **product gallery**, fully responsive across mobile and desktop.
- Implemented the **Recently Viewed Products** feature so users can quickly return to items they browsed.
- Developed the **Related Products** section to suggest similar items and keep users engaged on the product page.
- Connected the UI to backend REST APIs for product data, handling loading and error states.
- Collaborated with a 6-member team on GitHub, with features split across authentication, cart, checkout, payments, and admin modules.

Cakes Villas — MERN Stack Cake Ordering Platform Live Demo | GitHub Repo

- Engineered a full-stack e-commerce ordering platform using the MERN stack with a secure admin dashboard for order tracking and product management.
- Implemented dynamic routing and global state management using React Hooks for consistent data flow across pages.
- Built a responsive, mobile-first UI delivering a seamless checkout experience across devices.

Expense Tracker — Real-Time Finance Application Live Demo | GitHub Repo

- Built a real-time financial management tool using Firebase Firestore for instant data persistence and secure user data tracking.
- Designed secure authentication flows and interactive transaction history dashboards with reusable React components.

ADDITIONAL EXPERIENCE

Clerk — Asco International, Karachi 12/2024 – Present

- Managed documentation, digital record-keeping, and operational workflows, ensuring high accuracy and organizational efficiency.

Cashier — Pizza Max, Karachi 09/2023 – 12/2023

- Handled daily financial transactions, customer service, and point-of-sale (POS) operations in a fast-paced environment.
