Professional Experience

Oracle APEX Developer Burki Technologies Pvt. Ltd.

Jan 2026 – Present

Karachi, Pakistan

- Develop and maintain enterprise applications using Oracle APEX, Oracle Database, SQL, and PL/SQL.
- Develop ERP modules covering HR, Employee Self Service (ESS), Attendance, Leave Management, Payroll, and business workflows.
- Implement payroll processing with automated salary and tax calculations based on configurable business rules and tax slabs.
- Develop Employee Self Service functionality for leave management, task handling, and employee-related workflows.
- Developed a complete POS and Inventory Management solution covering sales, purchases, inventory, expenses, ledgers, receivables/payables, shift management, and stock transfers.
- Implement Profit & Loss and transaction-based reporting.
- Design database structures, relationships, constraints, SQL queries, PL/SQL procedures, functions, and business logic.
- Develop Interactive Reports and Interactive Grids with Dynamic Actions, validations, LOVs, and custom application processes.
- Integrate JasperReports with Oracle APEX for professional ERP, payroll, and business reporting.
- Use JavaScript and APEX JavaScript APIs for client-side customization and Interactive Grid functionality.
- Develop REST API integrations using JSON and ORDS.
- Develop a Complaint Management System with role-based workflows, priorities, office-wise processing, resolution tracking, and attachment management.
- Integrate Google Drive for external document and file storage.
- Develop QR-based Track & Trace functionality for monitoring product and process stages.

Selected Projects

ERP & HR Management System

Developed HR, Employee Self Service, Attendance, Leave Management, and Payroll modules. Implemented salary processing, automated tax calculations, workflows, validations, role-based functionality, and business reporting.

Point of Sale & Inventory Management System

Developed POS functionality covering sales, purchases, inventory, expenses, ledgers, receivables/payables, shifts, stock transfers, and branch-based operations. Implemented Profit & Loss and transaction reporting.

Complaint Management System

Developed complaint registration and tracking workflows with role-based processing, priorities, office-wise handling, resolution tracking, attachments, and Google Drive integration.

QR Track & Trace System

Developed QR-based tracking functionality to identify products and display their current processing stage and status.

JasperReports Integration

Integrated JasperReports with Oracle APEX applications and developed parameterized ERP, payroll, and business reports using Oracle database data.
