Ahmed Rehmat Khan

Web and AI builder | Former Co-Founder & CEO @AperaBoost | Former Co-Founder & PM @Markaaf Studios
Karachi Division, Sindh, Pakistan

Summary

I’m Ahmed Rehmat Khan — a Web Developer, Agentic AI Developer, Software Engineer, Product Manager, and Technology Entrepreneur passionate about building innovative digital products at the intersection of AI, software, automation, and product development.I believe technology is most powerful when it solves real problems. My approach combines engineering, product thinking, creativity, and execution to turn ideas into practical, scalable, and user-focused digital experiences.Leadership & EntrepreneurshipCo-Founder & CEO — AperaBoostAt AperaBoost, I focus on company vision, product strategy, technology, innovation, and transforming ideas into AI-powered and software-driven solutions. I’m particularly interested in AI automation, intelligent systems, modern web applications, and digital products that create measurable value.Co-Founder & Product Manager — MARKAAF StudiosAt MARKAAF Studios, I focus on product vision, planning, feature strategy, user experience, prioritization, and execution. I work to bridge the gap between business ideas and technical implementation, ensuring products are not only built well but built for a purpose.Technical FocusMy core technologies and areas of interest include:• Next.js & React• JavaScript & TypeScript• Python• HTML & CSS• Tailwind CSS• Full-Stack Web Development• Agentic AI & AI Applications• AI Automation• API Integration• Product Engineering• UI/UX & Digital ExperiencesI’m especially interested in how AI agents and intelligent automation are transforming software and creating entirely new possibilities for businesses and users.Product MindsetI believe great products are more than collections of features. They start with understanding the problem, the user, and the value.My product philosophy is:Problem → Strategy → Design → Build → Launch → Learn → ImproveI enjoy working across the complete product lifecycle — from an initial idea and product strategy to development, launch, feedback, and iteration.Continuous GrowthTechnology changes rapidly, so I believe continuous learning

is essential. I constantly explore new technologies, build projects, experiment with AI, and study how great products are designed and developed.My long-term goal is to build and contribute to technology that combines:Strong Engineering + Intelligent AI + Great UX + Product Strategy + Real-World ImpactI’m always open to connecting with founders, developers, product managers, designers, AI builders, entrepreneurs, and innovators who are creating the future of technology.Build. Learn. Experiment. Improve.
