- **Cloud Computing & Web Infrastructure:** Web Application Deployment, Domain & Hosting Administration, Cloud Platforms (Firebase Hosting)

- **Emerging Technologies & AI:** Fundamentals of Artificial Intelligence, AI Agents, Workflow Automation, Practical AI Development Tools

- **Operating Systems & Development Environments:** Systems Administration (Linux & Windows OS), Version Control (Git/GitHub), IDEs (VS Code), Web Hosting Infrastructure (GoDaddy)

- **Software Engineering & Project Management:** Software Metrics Analysis, IT Project Planning, Advanced Debugging Techniques, Performance Optimization

WORK EXPERIENCE

Assistant Trainer (Full-Stack Development) Saylani Mass IT Training Program | 1.5 Years

- Assisted in delivering comprehensive IT training, breaking down complex concepts to make them accessible to a diverse classroom of students.
- Hosted and facilitated multiple interactive technical sessions, sharing personal success stories and industry insights to motivate aspiring developers.
- Mentored student cohorts through practical challenges, guiding them on professional development workflows and best practices.

Freelance Web Developer & Consultant Independent Clients

- Successfully managed end-to-end project lifecycles for multiple independent clients, translating their business requirements into fully functional digital solutions.
- Communicated directly with stakeholders to gather requirements, provide strategic technical guidance, and ensure timely project delivery.
- Developed and deployed tailored web applications (including platforms like nuttyflavours.com and drfitzz.com), with a strong focus on user experience and client satisfaction.
- Handled all aspects of freelance client management, from initial consultation and project scoping to final handover and support.

TECHNICAL PROJECTS

- **Commercial Client Solutions (drfitzz.com & nuttyflavours.com):**

Managed the end-to-end development of paid e-commerce platforms. Implemented secure user authentication, responsive product catalogs, and cloud storage from initial concept to final deployment.

- **xtechme.com (Founder & Lead Developer):**

Directed the complete project lifecycle for a startup platform, successfully handling responsive interface design, domain configuration, and modern hosting setup.

- **AI Indus Week Hackathon (eventmagsystem.web.app):**

Rapidly engineered a fully functional Event Management System within a strict 6-hour timeframe during a competitive tech event in Quetta.

- **Academic & Demonstration Applications:**

Developed diverse web applications to showcase practical software engineering principles, including a University of Balochistan website clone **(uobquetta.netlify.app)**, an OLX clone, and a professional portfolio **(rizwanms.com)**.
