Education

Saylani mass it traing(smit) — hyderabad, pakistan
Web and Mobile App Development (Batch-7) — *may. 2025 – oct 2026*

himayat ul islam boys high school — hyderabad, pakistan
matriculation in science — *Expected 2027*

Experience

Backend Developer (Personal Projects) — 2026 – Present
Self-Directed — *Hyderabad, Pakistan*

- • Built a banking system REST API using Node.js, Express.js and MongoDB
- • Implemented JWT authentication, password hashing and secure transaction endpoints
- • Developing an LMS with role-based access and Stripe Connect payments

Projects

Banking System | *Node.js, Express.js, MongoDB, Mongoose, JWT* — 2026 – Present

- • Developed a RESTful banking API with user registration, login and account management
- • Implemented JWT authentication and password hashing for secure access
- • Built endpoints for [deposit / withdrawal / transfer, welcome email using nodemiller]
- • Tested all API endpoints using Postman

Learning Management System | *Node.js, Express.js, MongoDB, Stripe* — in progress

- • Building a role-based platform for students, trainers and admins
- • Integrating Stripe Connect for marketplace payments
- • Implemented JWT authentication and password hashing for secure access
- • Tested all API endpoints using Postman

Technical Skills

Languages: JavaScript, HTML5, CSS3;
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Password Hashing
Databases: MongoDB, Mongoose
Frontend: React.js, Next.js, React Native, Tailwind CSS
Developer tools: Git, GitHub, Postman, VS Code
