HASNAIN ALI

Django Web Application Developer

Islamabad, Pakistan | WhatsApp / Phone: +92 348 9924501

PROFESSIONAL SUMMARY

Django web developer from Gilgit-Baltistan, working on real-world web applications for businesses. I have built POS and CRM systems for multiple clients, and I am also working on my own product, **Balti Voice**, a web app for the Balti language and local tourism. I work on client services and my product side by side, and I care about clean, reliable and professional results.

PROFESSIONAL EXPERIENCE

Freelance Django Web Application Developer

Present

Self-employed | Multiple clients, Pakistan

- Built and delivered custom **POS systems and CRM web applications** for multiple clients using Django and MySQL.
- Example: a cafe POS with order management, cash-out and change calculation, admin-only order cancellation, daily closing and sales reports by payment method.
- Connected USB thermal receipt printers and WhatsApp Business, and designed clean, responsive interfaces that match each client's brand.
- Handled deployment and hosting on PythonAnywhere, Render and Vercel, and supported clients after delivery.

Balti Voice (own product, web)

Present

Founder & Developer | React / Next.js + Django

- Developing Balti Voice, a web app for learning the Balti language and supporting tourism in Gilgit-Baltistan, with lessons, quizzes, favorites and user login.
- Released a demo about a year ago that more than **1,000 users logged in to**; the full version is now being prepared for download.
- Working on the web app and the Django backend, including a weather feature for Skardu.
